COGNITIVE BIAS AND TOOLS FOR CRITICAL THINKING

CRITCAL THINKING

WHAT IS IT ABOUT?

A 2015 report on the future of jobs by the World Economic Forum has ranked critical thinking in the 2nd place of top skills for the future jobs.

Coveted business competencies such as strategic thinking, innovation or dealing with ambiguity are built on critical thinking skills and refined by disposition.

We like to think we're rational human beings, but we are prone to hundreds of proven biases, which distort the way we collect and process information. This can lead to errors in strategic decision making.

WHAT WILL YOU LEARN?

- Understand what cognitive biases are and how they affect decision-making

- Identify actions and strategies to counter cognitive biases in the workplace

- Learn how to deploy a wide range of tools for critical thinking to get better at analysing arguments and countering common thinking mistakes

DELAY YOUR INTUITION
